EDUCATION

Greenwich University **2020 - 2025**

Information Technology (IT)

SKILLS

- **Programming Languages**: Node.js, ReactJS, PHP, JavaScript, Golang, HTML5, CSS3
- **Frameworks and Tools**: Express.js, MVC Design Patterns, Git
- **Databases**: MySQL, SQL Server, MongoDB, Postgre SQL
- **Version Control Systems**: Git (GitHub/GitLab)

SOFTSKILLS

- Effective communication and teamwork skills
- Eagerness to learn and adapt to new technologies
- Time management and ability to work under pressure

WORK EXPERIENCE

- Intern Backend at TekNix Corporation (3/2025 - 6/2025)
- Software Implementation Specialist at FPT IIS (10/2025 - 11/2025)

Career Objective

A proactive and detail-oriented new graduate with a degree in Information Technology from Greenwich University. Possesses hands-on experience in back-end development through a successful internship at TekNix Corporation and multiple academic projects. Proficient in Golang, Node.js, and PostgreSQL with a solid understanding of microservices architecture and RESTful API design. Eager to apply strong problem-solving skills and a continuous learning mindset to contribute to building high-performance and scalable back-end systems.

Projects

Yen Sport - E-Commerce Website for Sports Good

March 2024 - November 2024

- Team Size: 1
- Technologies Used: Node.js, ReactJS, Express.js, MongoDB

Built a full-stack web application targeting sports enthusiasts and small retailers. Developed dynamic user interfaces, secure authentication, and powerful RESTful APIs for product management and order processing. Through this project, I learned how to integrate frontend-backend systems, optimize database queries, and implement real-time updates. Successfully implemented with improved user experience and optimized performance.

Consultation Booking System

March 2025 - June 2025

- Team Size: 4
- Backend: Golang, Gin Framework, GORM
- Database: PostgreSQL, Redis (caching)
- Infrastructure: Docker, JWT Authentication
- Development: Git, Postman, Air (hot-reload)
- Architecture: RESTful API, Microservices

* Led the project to develop user services, system security, and deployment infrastructure.
* Directly built authentication APIs (JWT), managed database connections (PostgreSQL, Redis), and implemented crucial middleware for security.
* Configured and deployed the system using Docker/docker-compose, performed integration testing, and authored technical documentation.

INTEREST

- Travel
- Play Football

University Magazine Contribution Platform

January 2024 - February 2024

- Team Size: 5
- Technologies Used: PHP, MySQL

Designed a web application to streamline article submissions for college students and faculty. Implemented core features to manage submissions, organize categories, and interact with users. Through this project, I gained experience in database design, team collaboration, and code optimization for efficiency. Increased the efficiency of the article submission process by 30% compared to manual methods.

Kyta Software Implementation Specialist

October 2025 - November 2025

Participate as a Specialist in supporting the implementation and training of users in the National Digital Transformation Project at provincial Civil Judgment Enforcement agencies. Coordinate with FPT IIS's professional team to deploy Kyta software, support staff in the process of applying the file management system and business processes to the digital environment.
